

1. Access to <https://fuki-uoa.github.io/CIM-TTS/cim.html>
2. Insert text to convert it to speech (e.g. Haere Mai)
3. Press the “Generate Voice” button to hear the speech
4. Please see the image below for visual aids

Cook Islands Māori Voice Synthesis

This is the first ever synthesised Cook Islands Māori Voice!

Built by Fuki Babasaki and Jenny Wang, using MaryTTS.
Simply type in some text into the text box, click generate and hear the voice!

Input your Text:

Haere Mai

Generate Voice

1. Insert text to convert it to speech

2. Press the button to hear the speech

0:01 / 0:01

The image shows a web application interface for Cook Islands Māori Voice Synthesis. It features a title, a subtitle, and a brief description. Below this is a text input field containing 'Haere Mai' and a 'Generate Voice' button. Two red arrows point to these elements with numbered instructions: '1. Insert text to convert it to speech' points to the text box, and '2. Press the button to hear the speech' points to the 'Generate Voice' button. At the bottom, there is a audio player showing a duration of 0:01 / 0:01.
